3 Courses

HTML: How to Build a Website

CSS: Web Page Layout - Usability and Accessibility

Data-driven websites: JSON, APIs and Templates

UNIVERSITY OF LONDON

Oct 28, 2026

Muhammad Ali Ejaz Bhatti

has successfully completed the online Specialization

Full-Stack Web Development

Master a solid foundation skills in web development, whether as preparation for an early-career role in the industry or as a pathway to further academic study. Begin with developing practical skills needed to create, manage, and deploy dynamic web pages. Gain a comprehensive understanding of front-end web development, exploring topics such as semantic HTML, accessible and responsive CSS, and data-driven JavaScript. The specialisation places particular emphasis on accessibility, user experience, and the semantic structure of web content, ensuring that learners can design inclusive and accessible web pages. Through a balance of theoretical principles and hands-on practical activities, learners gained insight into contemporary web development.

Prof. Matthew Yee-King
BSc MSc DPhil
Programme Director,
Computer Science BSc online
Goldsmiths, University of London

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
