Muhammad Ali Ejaz Bhatti

has successfully completed the online Professional Certificate

Microsoft Back-End Developer

Those who have earned this professional certificate have demonstrated their job readiness through hands-on experience and practical application. They possess a strong foundation in back-end development, including designing and optimizing web APIs, managing relational databases, implementing security and authentication measures, and optimizing application performance for scalability. They are proficient in modern frameworks like .NET, have applied advanced C# techniques, and leveraged Microsoft Copilot for coding and debugging. This certification proves their ability to build and deploy secure, efficient, and scalable back-end systems.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
