Muhammad Ali Ejaz Bhatti

has successfully completed the online Professional Certificate

Microsoft Full-Stack Developer

Those who have earned this professional certificate have demonstrated their job readiness through hands-on experience and practical application in full-stack development. They have built expertise in both front-end and back-end technologies, including creating responsive user interfaces, managing relational and non-relational databases, implementing security protocols, and deploying web applications. Proficiency in modern frameworks like .NET, as well as in using tools like Microsoft Copilot for coding and debugging, showcases their ability to develop, optimize, and maintain robust, scalable full-stack applications.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
