## Muhammad Ali Ejaz Bhatti

has successfully completed the online Professional Certificate

# Microsoft Front-End Developer

Those who have earned this professional certificate have demonstrated their job readiness through hands-on experience and practical application. They possess a strong foundation in front-end development, including building responsive, user-friendly websites, implementing advanced UI/UX design principles, and ensuring web accessibility. They are proficient in modern web technologies such as HTML, CSS, JavaScript, C#, and Blazor and have applied these skills to create dynamic web applications. They have also leveraged Microsoft Copilot for coding, debugging, and optimizing their projects. This certification proves their ability to develop secure, efficient, and interactive front-end applications.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
